Experience

Manish Kumar - React Developer

01/2023 - 01/2024

- Developed React applications using Redux state management and RESTful APIs.
- Created custom components, forms, and interfaces for user interactions in React.
- Debugged and resolved issues related to React components.
- Implemented automated tests for all React components using Jest and Enzyme.
- Integrated third-party libraries into existing React applications.
- Built reusable UI components that can be used across multiple projects with React.
- Optimized performance of existing React applications by utilizing best practices such as code splitting, lazy loading.
- Collaborated closely with UX and UI designers to ensure the best possible user experience while developing React applications.
- Utilized Node.js to develop server-side logic for web application development with React.
- Maintained up-to-date knowledge of industry trends and emerging technologies related to frontend development with React.
- Deployed production versions of react applications to cloud services such as AWS or Google Cloud Platform.
- Analyzed client needs and created technical specifications from those requirements when building out new features in a react application.
- Worked closely with product owners on requirements gathering, design decisions, and implementation strategies for new features in a react application.
